

## Start Co-development: Pharma, Biotech & Medical Devices

### Why Co-develop with IndiaUnbox?

India is known as the “**Pharmacy of the World**”, supplying affordable, high-quality pharmaceuticals, biotech products, and medical devices across 200+ countries.

Through IndiaUnbox, buyers can co-develop **formulations, biotech solutions, and medical devices** with access to **USFDA, WHO-GMP, CE, and ISO-certified facilities**. We help global partners bring **innovative, compliant, and scalable healthcare solutions** to market.

---

### Our Co-development Process

-  **Concept & Requirement Brief**
    - Define category: generics, APIs, biologics, diagnostics, medical devices.
    - Identify dosage form (tablets, injectables, ointments, nutraceuticals).
    - Regulatory pathway mapping (US, EU, Middle East, Asia).
  -  **Material & Technology Selection**
    - **Pharma:** APIs, excipients, drug delivery systems.
    - **Biotech:** Recombinant proteins, monoclonal antibodies, vaccines.
    - **Medical Devices:** Surgical instruments, disposables, diagnostics, implants.
    - **Sustainable Options:** Biodegradable materials, eco-friendly packaging.
  -  **Prototyping & Sampling**
    - Lab-scale formulation & pilot plant runs.
    - Device prototyping using CAD/3D printing.
    - Clinical/pre-clinical batch preparation.
  -  **Testing & Compliance**
    - Standards: WHO-GMP, USFDA, EMA, CDSCO, CE, ISO 13485.
    - Bioequivalence & stability studies.
    - Biocompatibility & sterilization validation for devices.
  -  **Production & Scaling**
    - From pilot runs (kg/liters) → commercial scale (MT-level pharma/API production, 10k–1M+ units device runs).
    - Fully automated sterile lines, biotech fermentation units, device assembly lines.
    - Cold chain logistics & export-ready packaging.
-

## What You Can Develop with Us

- **Pharmaceuticals:** APIs, generics, formulations (oral, injectable, topical).
  - **Biotech Products:** Vaccines, biosimilars, monoclonal antibodies, enzymes.
  - **Medical Devices:** Catheters, syringes, surgical kits, diagnostic devices, implants.
  - **Healthcare Products:** Nutraceuticals, herbal medicine, personal healthcare.
- 

## Why India for Pharma, Biotech & Medical Devices?

- **Global Leadership:** India supplies 20%+ of the world's generics.
  - **Cluster Strengths:**
    - Hyderabad (Telangana) → Pharma & biotech hub.
    - Ahmedabad, Ankleshwar (GJ) → APIs & formulations.
    - Bengaluru, Pune → Biotech & R&D.
    - Chennai, Delhi NCR → Medical devices & diagnostics.
  - **Compliance Ready:** Plants approved by USFDA, EMA, MHRA, WHO.
  - **Innovation Edge:** Growing biotech startups & R&D centers.
- 

## Ready to Co-develop?

 Share your **requirement brief** today and start your journey from **lab-to-market healthcare solutions** with IndiaUnbox.
